

Generic Name: N/A

Applicable Devices: Omnipod® 5, Omnipod DASH®, Omnipod Go, V-GO

Preferred: Omnipod® 5, Omnipod DASH®

Non-preferred: Omnipod Go, V-GO

Date of Origin: 9/2/2022

Date Last Reviewed / Revised: 5/14/2024

PRIOR AUTHORIZATION CRITERIA

(May be considered medically necessary when criteria I to V are met)

- I. Documented diagnosis of one of the following A or B AND must meet criteria listed under applicable diagnosis:
 - A. Diagnosis of type 1 diabetes mellitus
 - B. Diagnosis of type 2 diabetes mellitus and the following criteria A or B is met:
 1. Documentation of adherence to multiple daily injections of insulin (ie, basal and bolus insulin) for at least 6 months and treatment requires both a and b:
 - a) Frequent self-adjustments of insulin dose based on glucose measurements and carbohydrate counting
 - b) At least 4 self-monitoring of blood glucose (SMBG) tests per day or is using a continuous glucose monitor (CGM)
 2. Documentation of suboptimal glycemic control while adherent to multiple daily injections of insulin with at least 1 of the following symptoms or conditions:
 - a) Glycosylated hemoglobin level (HbA1c) > 7%
 - b) Recurrent hypoglycemia, recurrent nocturnal hypoglycemia, and/or hypoglycemia unawareness
 - c) Dawn phenomenon with fasting glucose levels exceeding 200 mg/dL
 - d) History of severe glycemic excursions
- II. Treatment is prescribed by or in consultation with an endocrinologist or a specialist in diabetes care.
- III. Request is for a device with the appropriate FDA labeling, or its use is supported by current clinical practice guidelines. Refer to Table 1 for FDA-approved indications.
- IV. Refer to the plan document for the list of preferred products. If the requested agent is not listed as a preferred product, must have documented treatment failure or contraindication to the preferred product(s).

EXCLUSION CRITERIA

- Patients not using a CGM who are unable to perform at least 4 SMBG tests per day.

QUANTITY / DAYS SUPPLY RESTRICTIONS

- Omnipod 5
 - 1 Intro Kit or 1 controller device per 4 years
 - 15 pods per 30 days
- Omnipod DASH
 - 1 Intro Kit or 1 Personal Diabetes Manager device per 4 years
 - 15 pods per 30 days
- Omnipod Go
 - 10 per 30 days
- V-GO
 - 30 per 30 days

APPROVAL LENGTH

- **Authorization:** 1 year
- **Re-Authorization:** 1 year, with updated progress notes documenting adherence to prescriber follow-up visits, proper and adherent device use, and a positive response to therapy compared to baseline (eg, decrease in HbA1c, reduced frequency of severe hypoglycemia episodes, increased time in range and/or decreased time below range, decrease in ER visits, etc.)

APPENDIX

Table 1. FDA indications for disposable insulin delivery systems.

	Type 1 Diabetes Mellitus	Type 2 Diabetes Mellitus	Minimum Age
Omnipod 5	✓		2 years
Omnipod DASH	✓	✓	N/A
Omnipod Go		✓	18 years
V-GO	✓	✓	21 years
